

About the Kanban Method

Kanban is a method of visualising progress information that targets the elimination of wasted time and effort by enabling rapid continuous re-prioritisation and the flow of high value work across a team.

About the Course

This one day course is designed to familiarise students with the development and use of Kanban Boards, how they apply to scheduling and their application to progress tracking and management.

Course Objectives

On completion of this course attendees are expected to be able to:

- » Create a Kanban board
- » Understand how to use a Kanban board
- » Explain some of the advantages of the 6 core practices of Kanban
- » Understand project roles related to the use of Kanban in projects
- » Start to identify whether work being requested is well enough described such that work can commence, and when work can be called complete.

Who Should Attend?

The course is suitable for people who are currently involved in project management who are being exposed to Agile approaches and also for managers of Agile environments wishing to understand the use of Kanban.

Course Prerequisites

The course assumes project management knowledge and general awareness of Agile. A brief summary of both is given to assist those who need their knowledge refreshed.

Delegate Participation

You will be involved in discussions and practical exercises that will allow you to consider the application of the Kanban method within your work environment.

Access and Equity

Tanner James strives to provide the optimum access and equity for candidates to its training services. To this end, it is important that clients notify Tanner James as early as possible when a participant may need to take advantage of these provisions.
